Noriel Fulgencio

Dr. Arellano C. Cahilig St. | Lezo, Aklan, 5605 | norielfulgencio246@gmail.com | 09951516381

EDUCATION

WEST VISAYAS STATE UNIVERSITY Iloilo, Philippines
Bachelor of Science in Information Technology *June, 2026*
Major in Software Technology. GWA: 1.31
Magna Cum Laude
Thesis: Image Classification-Based Remote Sensing Analysis of Land Zoning and Schedule of Use Classification for Opportunity Zones Recommendation (Best Thesis)

LEZO INTEGRATED SCHOOL Aklan, Philippines
Science, Technology, Engineering and Mathematics (With Honor) *April, 2021*

EXPERIENCE

PARK CABINS Remote
Full Stack Developer *June 2026 - March 2026*

- Built and deployed a custom CRM system on AWS for a cabin construction business, tailored to their booking and operations workflow using React, Laravel, and MySQL
- Engineered RESTful APIs using Laravel to handle reservations, customer data, and cabin availability in real time
- Designed and optimized MySQL database schema to support booking management, customer records, and reporting

PARK CABINS Remote
Automation Specialist (GoHighLevel) *Jan 2026 - March 2026*

- Worked with GoHighLevel to manage lead pipelines, contact tracking, and automated follow-up sequences
- Built and configured workflow automations (triggers, conditions, delays, actions) to handle lead capture, nurturing, and conversion
- Implemented multi-step automation workflows using n8n, integrating email and messaging platforms
- Connected multiple tools (email, messaging platforms) to eliminate manual data entry and improve workflow efficiency.
- Automated lead qualification and follow-up processes to improve response time and reduce missed opportunities
- Integrated AI (via OpenAI) to classify leads and trigger workflow actions based on intent

PERSONAL PROJECTS

ZENTRA CRM *March 2026*
Full Stack Developer

- Built a cloud-based CRM that helps sales teams track leads, manage clients, and monitor their entire pipeline from one central dashboard
- Designed a drag-and-drop sales board with one-click lead-to-client conversion and automated follow-up task creation to ensure no deal is missed
- Integrated an AI insights panel that highlights overdue tasks, inactive leads, and revenue forecasts to help teams close more deals faster

REALTORHQ *February 2026*
Full Stack Developer

- Built a property listing platform where buyers can browse, filter, and search properties on an interactive map that updates results in real time
- Enabled property owners to manage listings, upload photos, and handle booking requests, with an accept/reject system built into their dashboard
- Integrated an AI chat assistant that lets users find properties using plain language (e.g., "2-bedroom condo for rent under ₱20,000")

PERSONAL PROJECTS

SAAS PROJECT MANAGEMENT SYSTEM *February 2026*

Full Stack Developer

- Built a team collaboration platform where businesses can organize projects, assign tasks, and track progress — similar to Trello or ClickUp
- Designed a visual task board with drag-and-drop functionality, priorities, deadlines, checklists, file attachments, and threaded comments
- Built with multi-team support and role-based permissions so business owners can control who has access to what across their organization

ZONIFY *December 2024*

Full Stack Developer

- Built a web-based mapping system for local government that automatically identifies land use (residential, agricultural, or industrial) from uploaded aerial images
- Integrated an interactive map of Pavia, Iloilo displaying lot boundaries and roads, with automated zoning compliance checks that flag any violations
- Included a municipality-wide dashboard, full classification history, and admin tools for managing records and generating land use recommendations

SKILLS

Technical:

- **Languages:** PHP, JavaScript, Python, HTML, CSS
- **Frameworks:** Laravel, React, Flask
- **Databases:** MySQL, PostgreSQL
- **Deployment:** AWS, Railway, Vercel
- **Tools:** Git, Github Copilot, Claude
- **Automation & CRM:** GoHighLevel, n8n

Language: English, Tagalog
